

# Simplicity in Trade & Shipping

As in- or export company, you would like to know the details of manufacturing timelines, shipment conditions and have insight on receipt of funds (payable & receivable). Having access to near real-time information and knowledge on what's happening and the whereabouts of cargo, payments, customs anywhere around the world, means having direct control over your business. TransDocLink is your partner in giving the visibility of such setting control over your full supply chain, which eases the struggle to get the goods in time, on the right place with the right quality with no worries if payments are due and financing is possible

## Trade finance market dynamics

The market place of trade finance has not evolved as rapidly as other industries, especially ecommerce related industries. A trend is recognised that more producing companies directly sell & market their products and smaller companies are looking abroad for alternative sourcing options to buy products. Post Covid digitalisation and re- assessing your supply chains is a must TransDocLink (TDL) focusses on enabling Ecommerce by servicing both industries by bridging logistics and (trade) finance in the settlement of international supplier/buyer contracts. TDL transforms traditional supply chains by offering new steering & control mechanisms, transparency & consistency by applying smart contracts & financial settlement. This reduces costs, complexity and risk. This way everyone can do business internationally in a transparent, cost efficient and secure way!

**TransDocLink delivers a unique combination of freightforwarding & financial settlement providing transparency, cost efficiency, risk minimalization & ease of use**

The import company (Buyer) is linked directly to the export company (Seller) in a smart contract supporting both the financial supply chain as well as the document flows/exchange and logistical settlement.

## Freightforwarding

We deliver our services **well-balanced** in an optimal combination of a very experienced team of freightforwarders supported by an **intelligent digital platform**. All making use of Workflow management, Smart Contracts and Artificial Intelligence. The system is integrated via API's with appropriate stakeholders to ensure a trusted and correct transfer of goods, documents & funds. TDL makes **full control & ownership** visible tracking the movements of LCL, FCL, Bulk cargo via sea, air, rail and road. With a global agent network TDL can provide local ears and eyes to support smooth delivery.

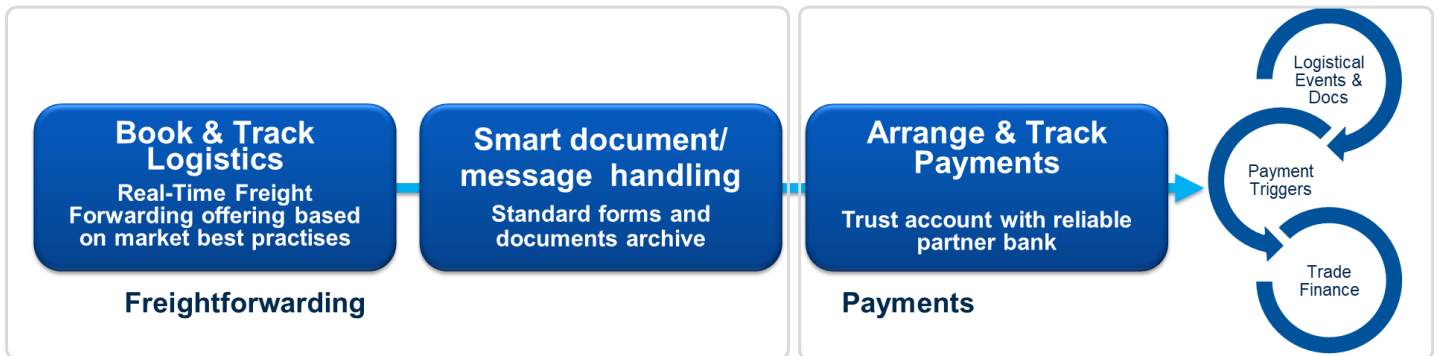

## Trade Finance & Alternative L/C

Since TDL has **full visibility** over cargo, documents & funds TDL can facilitate financing partners by positioning our platform as a **collateral management tool**. Credit partners, both banks, as well as Fintech, Crowd funding institutions and/ or investors, can **expand their business** making use of the full visibility of trades mitigating their risks. TDL provides a modern, cost-effective transparent way for settlements of global trades. TDL by using T-Deal can deliver an **alternative for Letter of Credits** by applying our (Dutch Central Bank Regulated) 3rd party **trust account & escrow** services. TDL platform can release funds based on **evidence** of delivery. You can access a **multi-currency** trust account via our platform wallet. TDL enables the clients in **Digital Transformation** by facilitating current (partly paper based) business operations with new technologies (API's, smart contracts, IoT) and prepare for further development (Blockchain, Tokenization, ...).
